FINAL WEEK OF LEGISLATION.

Much Work is Before Solons and Many Bills to Pass.

Atlanta, Ga., August 15.—The Georgia legislature will probably crowd more work into this, the final week of the session, than it has accomplished in any three weeks since it assembled.

While the house is winding up its work on the new counties and discussing special appropriation bills, the senate will be wrestling with the general tax bill which it will doubtless dispose of before it takes up the new county bills passed by the house.

The will come numerous general bills for the consideration of both houses, for outside of the appropriations and tax bills, the new county bills, the reformatory bill and the child labor bill, no general legislation of any consequence has been given consideration during the forty-five days of the session, which has passed.

The house will conclude the new county legislation today and will then take up the general appropriations bill to pass on the senate amendments, to be followed by the bill which asks members to see who can get their an appropriation of \$75,000 for a new water works system at the state sanitarium.

Tuesday and Wednesday the house will give to general house bills and there will be a scramble among the measures acted on first. These are the last days upon which house bills can be passed in time to get through the senate at this session.

Tuesday the senate will discuss and act on the child labor bill, which has already passed the house, and this will be followed by the general tax bill, which will have to be passed at the earliest possible moment. Then the senate will be ready to tackle the new counties.

A Worm Killer.

I tried everything to relieve them, which failed until I used White's Cream Vermifuge; the first two doses brought four worms from one of them, the next two doses, twelve, one of them measuring twelve inches; the other child was only relieved of four worms. It is an excellent medicine." White's Cream Vermifuge is good for children. It not only destroys worms—it helps the child to perfect growth, wards off sickness. Sold by W. M. Johnson.

ACTIVE VOLCANO IN NEVADA.

Two Explorers Find Mountain Throwing Out Lava in that State.

San Francisco, August 15.—A special dispatch to the Chronicle from Reno, Nev., says:

A volcano throwing off molten lava and in active operation has been discovered in Nevada, by Messrs. McClure, Wheeler and Somers, cattle men of Lovelock.

The volcano is located in Rye Patch, Humboldt county. Although that section has been traversed for years, the crater has just been found. The men were in search of cattle when they came upon the stream of lava and tracing it to its source, located the volcano.

The rocks for some distance are under such heat that they could not touch them with their bare hands. Distinct rumblings accompany the flow of lava.
